Every film. Ready to move.

11 prompts / 8 scroll-scrub films + 3 loops

HOW TO USE THIS PACK

Make the stills and exploded end frames first using the separate Image Prompts PDF. For F01-F08, select first-and-last-frame generation: attach the matching S image as the first frame and matching E image as the last. Copy the complete prompt for that film. All product, explosion and background placeholders are already filled in.

SETTINGS FROM YOUR BRIEF

Scrub films: Gemini Omni Flash or Veo 3.1, 8 seconds, 16:9, 1080p, first + last frame. Loops: the same model choices, 8 seconds, 16:9, 1080p. L01 and L02 are text to video; L03 uses S11 for both first and last frames. Model names are copied from the supplied brief; availability has not been checked.

Turn audio off if available. Keep the full-quality original downloads. The shared style retains the original "4K" quality cue, but the requested final video export is 1080p. Save the filenames shown on each page into D:/BR-ICE/assets/.

THE SCROLL-FILM TIMELINE

0-1.5 seconds: the whole product floats still; rotation stays below 5°. 1.5-6 seconds: a smooth, graceful explosion reveals the ingredients. 6-8 seconds: pieces settle into the supplied exploded frame. Aim for a stable final 1.5-2 seconds.

GENERATE IN THIS ORDER

F01 hero pint first, for the website checkpoint. Then F08 sugar cube, F02-F07 flavours, and L01-L03 loops. Draft two or three low-resolution takes first; render the smoothest take at 1080p. A locked camera and constant lighting are essential for reversible scrolling.

Match the frames

Prepare these exact image pairs before generating.

F01 / Hero pint

FIRST: still-pint-closed.png LAST: end-pint.png SAVE: film-pint.mp4

F02 / Madagascar Vanilla Bean

FIRST: still-vanilla.png LAST: end-vanilla.png SAVE: film-vanilla.mp4

F03 / Belgian Dark Chocolate

FIRST: still-chocolate.png LAST: end-chocolate.png SAVE: film-chocolate.mp4

F04 / Alphonso Mango

FIRST: still-mango.png LAST: end-mango.png SAVE: film-mango.mp4

F05 / Sicilian Pistachio

FIRST: still-pistachio.png LAST: end-pistachio.png SAVE: film-pistachio.mp4

F06 / Strawberry & Cream

FIRST: still-strawberry.png LAST: end-strawberry.png SAVE: film-strawberry.mp4

F07 / Salted Caramel

FIRST: still-caramel.png LAST: end-caramel.png SAVE: film-caramel.mp4

F08 / Zero sugar

FIRST: still-sugar-cube.png LAST: end-sugar-cube.png SAVE: film-sugar-cube.mp4

L01 and L02: text to video. L03: still-floating-scoops.png as both FIRST and LAST.

Hero pint

F01 / scroll-scrub film / 8 seconds

F01 / Complete generation prompt

SAVE AS film-pint.mp4

Omni Flash or Veo 3.1 / 16:9 / 1080p / 8 s / Audio off. FIRST: still-pint-closed.png | LAST: end-pint.png

Locked-off camera: no camera movement, no zoom, no cuts, constant lighting, and the background stays the exact same solid colour with no flicker for the whole clip. 0 to 1.5 s: the pink ice cream pint floats perfectly still in the centre, turning less than 5°. 1.5 to 6 s: it bursts apart in smooth, graceful slow motion, the lid pops off and rises, the tub peels open into four curved panels that drift outward, the vanilla bean ice cream inside rises and splits into three slabs, and a ring of fresh milk splashes out while ingredients from every flavour fly gently outward from behind it. 6 to 8 s: every piece slows down and hangs suspended, ending exactly on the last frame. Weightless, physical, satisfying motion, like a premium product teardown. The ice cream stays firm and fully frozen the whole time, no melting, no drips.

Premium ice cream commercial, photorealistic, shot on ARRI Alexa 65 with a 100mm macro lens, bright high-key studio lighting: large soft key light from the upper left, crisp white rim light, vivid saturated colour, glossy frozen texture with crisp scoop ridges and visible fine ice-cream grain, firm and fully frozen with no melting and no drips, subject floating in mid-air, no ground, no table, no shadows on the background, seamless solid bubblegum pink #FF8FBF, slightly deeper than the tub background with no gradient and no vignette, centred subject, generous negative space, no hands, no people, no text, no logos, no lettering, no watermarks, 16:9, 4K.

CHECK THIS TAKE

Keep every fragment inside the frame. No camera drift, cuts, lighting changes or background flicker. The final 1.5-2 seconds should hold the exploded composition. Reject melting ice cream, added text or a visible watermark.

Madagascar Vanilla Bean

F02 / scroll-scrub film / 8 seconds

F02 / Complete generation prompt

SAVE AS film-vanilla.mp4

Omni Flash or Veo 3.1 / 16:9 / 1080p / 8 s / Audio off. FIRST: still-vanilla.png | LAST: end-vanilla.png

Locked-off camera: no camera movement, no zoom, no cuts, constant lighting, and the background stays the exact same solid colour with no flicker for the whole clip. 0 to 1.5 s: the vanilla bean ice cream cone floats perfectly still in the centre, turning less than 5°. 1.5 to 6 s: it bursts apart in smooth, graceful slow motion, the waffle cone cracks into large shards that drift outward and down, the scoop slices into three layers that lift apart, and vanilla pods, a vanilla orchid, fresh milk droplets and halved monk fruit burst out from the centre. 6 to 8 s: every piece slows down and hangs suspended, ending exactly on the last frame. Weightless, physical, satisfying motion, like a premium product teardown. The ice cream stays firm and fully frozen the whole time, no melting, no drips.

Premium ice cream commercial, photorealistic, shot on ARRI Alexa 65 with a 100mm macro lens, bright high-key studio lighting: large soft key light from the upper left, crisp white rim light, vivid saturated colour, glossy frozen texture with crisp scoop ridges and visible fine ice-cream grain, firm and fully frozen with no melting and no drips, subject floating in mid-air, no ground, no table, no shadows on the background, seamless solid cobalt blue #2D5BFF background with no gradient and no vignette, centred subject, generous negative space, no hands, no people, no text, no logos, no lettering, no watermarks, 16:9, 4K.

CHECK THIS TAKE

Keep every fragment inside the frame. No camera drift, cuts, lighting changes or background flicker. The final 1.5-2 seconds should hold the exploded composition. Reject melting ice cream, added text or a visible watermark.

Belgian Dark Chocolate

F03 / scroll-scrub film / 8 seconds

F03 / Complete generation prompt

SAVE AS film-chocolate.mp4

Omni Flash or Veo 3.1 / 16:9 / 1080p / 8 s / Audio off. FIRST: still-chocolate.png | LAST: end-chocolate.png

Locked-off camera: no camera movement, no zoom, no cuts, constant lighting, and the background stays the exact same solid colour with no flicker for the whole clip. 0 to 1.5 s: the dark chocolate ice cream cone floats perfectly still in the centre, turning less than 5°. 1.5 to 6 s: it bursts apart in smooth, graceful slow motion, the cone cracks into large shards that drift outward and down, the scoop slices into three layers that lift apart, and dark chocolate shards, a halved cocoa pod, cocoa nibs, a puff of cocoa powder and milk droplets burst out from the centre. 6 to 8 s: every piece slows down and hangs suspended, ending exactly on the last frame. Weightless, physical, satisfying motion, like a premium product teardown. The ice cream stays firm and fully frozen the whole time, no melting, no drips.

Premium ice cream commercial, photorealistic, shot on ARRI Alexa 65 with a 100mm macro lens, bright high-key studio lighting: large soft key light from the upper left, crisp white rim light, vivid saturated colour, glossy frozen texture with crisp scoop ridges and visible fine ice-cream grain, firm and fully frozen with no melting and no drips, subject floating in mid-air, no ground, no table, no shadows on the background, seamless solid sunflower yellow #FFD23F background with no gradient and no vignette, centred subject, generous negative space, no hands, no people, no text, no logos, no lettering, no watermarks, 16:9, 4K.

CHECK THIS TAKE

Keep every fragment inside the frame. No camera drift, cuts, lighting changes or background flicker. The final 1.5-2 seconds should hold the exploded composition. Reject melting ice cream, added text or a visible watermark.

Alphonso Mango

F04 / scroll-scrub film / 8 seconds

F04 / Complete generation prompt

SAVE AS film-mango.mp4

Omni Flash or Veo 3.1 / 16:9 / 1080p / 8 s / Audio off. FIRST: still-mango.png | LAST: end-mango.png

Locked-off camera: no camera movement, no zoom, no cuts, constant lighting, and the background stays the exact same solid colour with no flicker for the whole clip. 0 to 1.5 s: the Alphonso mango ice cream cone floats perfectly still in the centre, turning less than 5°. 1.5 to 6 s: it bursts apart in smooth, graceful slow motion, the cone cracks into large shards that drift outward and down, the scoop slices into three layers that lift apart, and mango cubes, a mango cheek, mango leaves and milk droplets burst out from the centre. 6 to 8 s: every piece slows down and hangs suspended, ending exactly on the last frame. Weightless, physical, satisfying motion, like a premium product teardown. The ice cream stays firm and fully frozen the whole time, no melting, no drips.

Premium ice cream commercial, photorealistic, shot on ARRI Alexa 65 with a 100mm macro lens, bright high-key studio lighting: large soft key light from the upper left, crisp white rim light, vivid saturated colour, glossy frozen texture with crisp scoop ridges and visible fine ice-cream grain, firm and fully frozen with no melting and no drips, subject floating in mid-air, no ground, no table, no shadows on the background, seamless solid lilac #B9A4FF background with no gradient and no vignette, centred subject, generous negative space, no hands, no people, no text, no logos, no lettering, no watermarks, 16:9, 4K.

CHECK THIS TAKE

Keep every fragment inside the frame. No camera drift, cuts, lighting changes or background flicker. The final 1.5-2 seconds should hold the exploded composition. Reject melting ice cream, added text or a visible watermark.

Sicilian Pistachio

F05 / scroll-scrub film / 8 seconds

F05 / Complete generation prompt

SAVE AS film-pistachio.mp4

Omni Flash or Veo 3.1 / 16:9 / 1080p / 8 s / Audio off. FIRST: still-pistachio.png | LAST: end-pistachio.png

Locked-off camera: no camera movement, no zoom, no cuts, constant lighting, and the background stays the exact same solid colour with no flicker for the whole clip. 0 to 1.5 s: the pistachio ice cream cone floats perfectly still in the centre, turning less than 5°. 1.5 to 6 s: it bursts apart in smooth, graceful slow motion, the cone cracks into large shards that drift outward and down, the scoop slices into three layers that lift apart, and pistachios in their shells, green kernels, crushed pistachio dust and milk droplets burst out from the centre. 6 to 8 s: every piece slows down and hangs suspended, ending exactly on the last frame. Weightless, physical, satisfying motion, like a premium product teardown. The ice cream stays firm and fully frozen the whole time, no melting, no drips.

Premium ice cream commercial, photorealistic, shot on ARRI Alexa 65 with a 100mm macro lens, bright high-key studio lighting: large soft key light from the upper left, crisp white rim light, vivid saturated colour, glossy frozen texture with crisp scoop ridges and visible fine ice-cream grain, firm and fully frozen with no melting and no drips, subject floating in mid-air, no ground, no table, no shadows on the background, seamless solid coral #FF7A6B background with no gradient and no vignette, centred subject, generous negative space, no hands, no people, no text, no logos, no lettering, no watermarks, 16:9, 4K.

CHECK THIS TAKE

Keep every fragment inside the frame. No camera drift, cuts, lighting changes or background flicker. The final 1.5-2 seconds should hold the exploded composition. Reject melting ice cream, added text or a visible watermark.

Strawberry & Cream

F06 / scroll-scrub film / 8 seconds

F06 / Complete generation prompt

SAVE AS film-strawberry.mp4

Omni Flash or Veo 3.1 / 16:9 / 1080p / 8 s / Audio off. FIRST: still-strawberry.png | LAST: end-strawberry.png

Locked-off camera: no camera movement, no zoom, no cuts, constant lighting, and the background stays the exact same solid colour with no flicker for the whole clip. 0 to 1.5 s: the strawberry and cream ice cream cone floats perfectly still in the centre, turning less than 5°. 1.5 to 6 s: it bursts apart in smooth, graceful slow motion, the cone cracks into large shards that drift outward and down, the scoop slices into three layers that lift apart, and fresh strawberries, strawberry slices, leaves and ribbons of cream burst out from the centre. 6 to 8 s: every piece slows down and hangs suspended, ending exactly on the last frame. Weightless, physical, satisfying motion, like a premium product teardown. The ice cream stays firm and fully frozen the whole time, no melting, no drips.

Premium ice cream commercial, photorealistic, shot on ARRI Alexa 65 with a 100mm macro lens, bright high-key studio lighting: large soft key light from the upper left, crisp white rim light, vivid saturated colour, glossy frozen texture with crisp scoop ridges and visible fine ice-cream grain, firm and fully frozen with no melting and no drips, subject floating in mid-air, no ground, no table, no shadows on the background, seamless solid mint #7DE3C3 background with no gradient and no vignette, centred subject, generous negative space, no hands, no people, no text, no logos, no lettering, no watermarks, 16:9, 4K.

CHECK THIS TAKE

Keep every fragment inside the frame. No camera drift, cuts, lighting changes or background flicker. The final 1.5-2 seconds should hold the exploded composition. Reject melting ice cream, added text or a visible watermark.

Salted Caramel

F07 / scroll-scrub film / 8 seconds

F07 / Complete generation prompt

SAVE AS film-caramel.mp4

Omni Flash or Veo 3.1 / 16:9 / 1080p / 8 s / Audio off. FIRST: still-caramel.png | LAST: end-caramel.png

Locked-off camera: no camera movement, no zoom, no cuts, constant lighting, and the background stays the exact same solid colour with no flicker for the whole clip. 0 to 1.5 s: the salted caramel ice cream cone floats perfectly still in the centre, turning less than 5°. 1.5 to 6 s: it bursts apart in smooth, graceful slow motion, the cone cracks into large shards that drift outward and down, the scoop slices into three layers that lift apart, and ribbons of caramel stretch through the air while amber caramel shards, sea salt flakes and milk droplets burst out from the centre. 6 to 8 s: every piece slows down and hangs suspended, ending exactly on the last frame. Weightless, physical, satisfying motion, like a premium product teardown. The ice cream stays firm and fully frozen the whole time, no melting, no drips.

Premium ice cream commercial, photorealistic, shot on ARRI Alexa 65 with a 100mm macro lens, bright high-key studio lighting: large soft key light from the upper left, crisp white rim light, vivid saturated colour, glossy frozen texture with crisp scoop ridges and visible fine ice-cream grain, firm and fully frozen with no melting and no drips, subject floating in mid-air, no ground, no table, no shadows on the background, seamless solid deep teal #0F8A8A background with no gradient and no vignette, centred subject, generous negative space, no hands, no people, no text, no logos, no lettering, no watermarks, 16:9, 4K.

CHECK THIS TAKE

Keep every fragment inside the frame. No camera drift, cuts, lighting changes or background flicker. The final 1.5-2 seconds should hold the exploded composition. Reject melting ice cream, added text or a visible watermark.

Zero sugar

F08 / scroll-scrub film / 8 seconds

F08 / Complete generation prompt

SAVE AS film-sugar-cube.mp4

Omni Flash or Veo 3.1 / 16:9 / 1080p / 8 s / Audio off. FIRST: still-sugar-cube.png | LAST: end-sugar-cube.png

Locked-off camera: no camera movement, no zoom, no cuts, constant lighting, and the background stays the exact same solid colour with no flicker for the whole clip. 0 to 1.5 s: the white sugar cube floats perfectly still in the centre, turning less than 5°. 1.5 to 6 s: it bursts apart in smooth, graceful slow motion, the cube cracks and dissolves into a glittering cloud of sugar crystals that drifts out towards the edges and thins away, revealing a whole monk fruit and a halved monk fruit floating in the centre. 6 to 8 s: every piece slows down and hangs suspended, ending exactly on the last frame. Weightless, physical, satisfying motion, like a premium product teardown. The ice cream stays firm and fully frozen the whole time, no melting, no drips.

Premium ice cream commercial, photorealistic, shot on ARRI Alexa 65 with a 100mm macro lens, bright high-key studio lighting: large soft key light from the upper left, crisp white rim light, vivid saturated colour, glossy frozen texture with crisp scoop ridges and visible fine ice-cream grain, firm and fully frozen with no melting and no drips, subject floating in mid-air, no ground, no table, no shadows on the background, seamless solid tangerine #FF8A3D background with no gradient and no vignette, centred subject, generous negative space, no hands, no people, no text, no logos, no lettering, no watermarks, 16:9, 4K.

CHECK THIS TAKE

Keep every fragment inside the frame. No camera drift, cuts, lighting changes or background flicker. The final 1.5-2 seconds should hold the exploded composition. Reject melting ice cream, added text or a visible watermark.

Real milk

L01 / continuous loop / 8 seconds

L01 / Complete generation prompt

SAVE AS loop-milk.mp4

Omni Flash or Veo 3.1 / 16:9 / 1080p / 8 s / Audio off. Text to video. No input frames required.

Extreme slow motion at 1000 fps: a smooth stream of fresh white milk pours down from the top of the frame into the centre, where it folds and swirls into a perfect spiral of soft-serve ice cream, while small crowns of milk splash and droplets hang in the air around it. Locked-off camera, constant lighting, seamless loop with the pour continuing at the start and end, no container, no cone.

Premium ice cream commercial, photorealistic, shot on ARRI Alexa 65 with a 100mm macro lens, bright high-key studio lighting: large soft key light from the upper left, crisp white rim light, vivid saturated colour, glossy frozen texture with crisp scoop ridges and visible fine ice-cream grain, firm and fully frozen with no melting, subject floating in mid-air, no ground, no table, no shadows on the background, seamless solid sky blue #9FD3FF background with no gradient and no vignette, centred subject, generous negative space, no hands, no people, no text, no logos, no lettering, no watermarks, 16:9, 4K.

LOOP NOTE

The 1000 fps wording describes the slow-motion look, not the export frame rate. The milk pour is the intentional exception to the no-drips instruction.

The texture

L02 / continuous loop / 8 seconds

L02 / Complete generation prompt

SAVE AS loop-scoop-curl.mp4

Omni Flash or Veo 3.1 / 16:9 / 1080p / 8 s / Audio off. Text to video. No input frames required.

Extreme macro close-up, the frame filled edge to edge with a tub of vanilla bean ice cream: a polished steel ice cream scoop glides slowly across the surface from left to right, curling up a thick, perfect ribbon of ice cream with crisp ridges and visible bean flecks, a light frost glittering on the surface. Slow, smooth, satisfying, ASMR-like. Camera tracks very slowly alongside, constant lighting.

Premium ice cream commercial, photorealistic, shot on ARRI Alexa 65 with a 100mm macro lens, bright high-key studio lighting: large soft key light from the upper left, crisp white rim light, vivid saturated colour, glossy frozen texture with crisp scoop ridges and visible fine ice-cream grain, firm and fully frozen with no melting and no drips, shallow depth of field, the ice cream fills the frame, no hands, no people, no text, no logos, no lettering, no watermarks, 16:9, 4K.

LOOP NOTE

The slow tracking camera and steel scoop are intentional exceptions to the locked-camera and no-utensil rules for scroll films. The image fills the frame; do not add a solid-colour studio backdrop. Check the loop join for a visible jump.

Floating scoops

L03 / continuous loop / 8 seconds

L03 / Complete generation prompt

SAVE AS loop-floating.mp4

Omni Flash or Veo 3.1 / 16:9 / 1080p / 8 s / Audio off. FIRST and LAST: still-floating-scoops.png (S11).

The six scoops of ice cream bob gently up and down and turn slowly in place, each at its own pace, as if floating in zero gravity, then settle back exactly to where they started. Locked-off camera, no cuts, constant lighting, the background stays the same solid colour, the scoops stay fully frozen.

Premium ice cream commercial, photorealistic, shot on ARRI Alexa 65 with a 100mm macro lens, bright high-key studio lighting: large soft key light from the upper left, crisp white rim light, vivid saturated colour, glossy frozen texture with crisp scoop ridges and visible fine ice-cream grain, firm and fully frozen with no melting and no drips, subject floating in mid-air, no ground, no table, no shadows on the background, seamless solid warm cream #FFF3E2 background with no gradient and no vignette, centred subject, generous negative space, no hands, no people, no text, no logos, no lettering, no watermarks, 16:9, 4K.

LOOP NOTE

Use the identical S11 image in both frame slots. Check the end-to-start join: positions, rotations, lighting and background should match.

Approve, then hand off

Quality checklist and website-processing requirements

CHECK EVERY FILM

• No text, lettering, logos, fake labels or visible watermarks.

• Background stays one flat colour, with no gradient or flicker. L02 intentionally fills the frame with texture.

• Camera completely still in every F clip. L02 alone allows its specified slow camera track.

• Ice cream never melts, sags or drips. L01 intentionally includes pouring milk.

• No hands, people or spoons in product films; L02 intentionally includes the metal scoop.

• No piece leaves the frame during an explosion.

• The last 1.5-2 seconds of every F clip hold the exploded end frame.

• S02-S07 products remain consistent across all six films.

• Loops join cleanly without a pop or sudden change in motion.

KEEP ORIGINAL DOWNLOADS

Use the exact film-* and loop-* filenames in this PDF and save the originals in D:/BR-ICE/assets/. Do not make mobile copies or compress them manually; the website media pipeline can create those from the originals.

PROCESSING SPECIFICATION FOR THE WEBSITE

Scroll clips: H.264, no audio, faststart; 1280px wide at CRF 25 and mobile 720px wide at CRF 27. Keep keyint=2:min-keyint=1:scenecut=0:bframes=0. Loops: 1280px wide, CRF 26. Extract first and last frames as posters; use end frames for reduced motion. Sample each first-frame background for the matching section colour. Aim for media/ under about 55 MB.

These are post-production instructions, not words to paste into the video generator.
